Radiation Oncologist Joins UF Proton Therapy Institute

JACKSONVILLE, Fla. – The University of Florida Proton Therapy Institute has added Curtis Bryant, M.D., M.P.H. to its team of radiation oncologists. Bryant is a UF faculty member, currently serving as an assistant professor of radiation oncology. His clinical specialties and research interests include treatment of patients with prostate cancer or metastatic cancer.

“We are excited to announce the arrival of Dr. Bryant,” said UF Proton Therapy Institute medical director Nancy Mendenhall, M.D. “His proton therapy experience and special interests make him a valuable member of the team here at the Institute.”

Prior to his experience at UF Proton Therapy Institute, Bryant was a resident physician in radiation oncology at the University of Florida’s College of Medicine. He completed his medical degree and master’s in public health at the University of North Carolina, located in Chapel Hill, North Carolina. Bryant is board eligible in radiation oncology clinical practice and is a member of the American Medical Association, American Society for Radiation Oncology (ASTRO).

An experienced researcher, his work has led to publications in peer-reviewed journals and presentations at national and international medical and scientific meetings.

UF Proton Therapy Institute is a nonprofit 501(c)3 organization affiliated with the UF College of Medicine, dedicated to delivering state-of-the-art cancer treatment and setting new standards for treating and curing cancer. The cancer treatment facility houses both conventional radiation and proton therapy, and delivers proton therapy to 110 patients a day. For more information about the UF Proton Therapy Institute, please visit www.floridaproton.org, or call toll-free 877-686-6009.
